Contents of Volume 3

Number 1, July 1960

BRITTON CHANCE AND BUNJI HAGIHARA. Initiation of Succinate Oxidation in Aged Pigeon Heart Mitochondria 1

BRITTON CHANCE AND BUNJI HAGIHARA. An ATP Requirement for Succinate-Linked DPN Reduction 6

BRITTON CHANCE. ATP/DPNH Stoichiometry in Succinate-Linked DPN Reduction 10

JERARD HURWITZ, ANN BRESLER, AND RENATA DIRINGER. The Enzymic Incorporation of Ribonucleotides into Polyribonucleotides and the Effect of DNA .. 15

CHIEN HO AND JULIEN M. STURTEVANT. Activation of Bovine Carbonic Anhydrase by Ethylenediamine Tetraacetic Acid 20

H. KELLER, P. GOTTWALD, AND N. WENDLING. The Role of Zinc in Carbonic Anhydrase 24

HAROLD L. SEGAL, GOVIND K. K. MENON, AND CLARK BUBLITZ. Elevation in Acetoacetate Formation from Acetoacetyl-CoA in Diabetic Rat Liver Preparations 28

W. J. A. VANDENHEUVEL, C. C. SWEELEY, AND E. C. HORNING. Microanalytical Separations by Gas Chromatography in the Sex Hormone and Bile Acid Series 33

F. L. CRANE, BARBARA EHRLICH, AND L. P. KEGEL. Plastoquinone Reduction in Illuminated Chloroplasts 37

HELMUT BEINERT AND R. H. SANDS. Studies on Succinic and DPNH Dehydrogenase Preparations by Paramagnetic Resonance (EPR) Spectroscopy 41

R. H. SANDS AND HELMUT BEINERT. Studies on Mitochondria and Submitochondrial Particles by Paramagnetic Resonance (EPR) Spectroscopy 47

H. E. BOND. A Sex-Associated Protein in Liver Tissues of the Male Rat 53

K. KECK. Nucleo-cytoplasmic Interactions in the Synthesis of Species-Specific Proteins in *Acetabularia* 56

JOHN P. ROBINSON AND VICTOR A. NAJJAR. The Time Dependent Activation of Crystalline Phosphoglutomutase by Magnesium Ions and Imidazole 62

LESTER PACKER AND M. D. PERRY. Respiration and Light-Scattering in *Escherichia coli* 67

ROBERT BERNER LOFTFIELD AND ELIZABETH ANN EIGNER. Scintillation Counting of Paper Chromatograms 72

A. M. MACQUILLAN, S. WINDERMAN, AND H. O. HALVORSON. The Control of Enzyme Synthesis by Glucose and the Repressor Hypothesis 77

E. RENO TUSTANOFF AND JOSEPH R. STERN. Enzymic Carboxylation of Crotonyl-CoA and the Metabolism of Glutaric Acid 81

D. F. ELLIOTT, G. P. LEWIS, AND E. W. HORTON. The Structure of Bradykinin — A Plasma Kinin from Ox Blood 87

AUDREY STEVENS. Incorporation of the Adenine Ribonucleotide into RNA by Cell Fractions from *E. coli* B 92

PARTAB T. VARANDANI, GEORGE WOLF, AND B. CONNOR JOHNSON. Function of Vitamin A in the Synthesis of 3′-Phosphoadenosine-5′-phosphosulfate 97

MARGORIE G. HORNING, DONALD B. MARTIN, ARTHUR KARMEN, AND P. ROY VAGELOS. Synthesis of Branched-Chain and Odd-Numbered Fatty Acids from Malonyl-CoA 101

FLOYD S. EBERTS., JR. 1,1,3-Tricyano-2-amino-1-propene (U-9189), A Biologically-Active Component of Aqueous Solutions of Malononitrile 107

ROBERT H. FEINBERG AND RANWEL CAPUTTO. Hydrogen Peroxide Stimulation of the Formation of Ascorbic Acid from L-Gulonolactone by Rat Liver Preparations 110

SOL H. GOODGAL AND NORMAN E. MELECHEN. Synthesis of Transforming DNA in the Presence of Chloramphenicol 114

R. W. TREHARNE, T. E. BROWN, H. C. EYSTER, AND H. A. TANNER. Electron Spin Resonance Studies of Manganese in *Chlorella Pyrenoidosa* 119

R. A. VAN DYKE, G. WOLF, AND B. CONNOR JOHNSON. The Function of Vitamin A in Adrenal Steroid Production 123

Number 2, August 1960

STANLEY M. GARTLER
Demonstration of Cellular Uptake of Polymerized DNA in Mammalian Cell Cultures 127

M. S. BLOIS, JR., AND J. E. MALING
The Coenzyme Q_{10} and Vitamin K_1 Semiquinone Free Radicals 132

YOSHITAKE MANO, KANTARO SUZUKI, KAZUO YAMADA, AND NORIO SHIMAZONO
Substrate Specificity of TPN L-Hexonate Dehyrogenase 136

H. HILZ AND M. KITTLER
Reduction of Active Sulfate (PAPS) by Dihydrolipoic Acid as Substrate.... 140

RODERICK K. CLAYTON AND CAROLMARIE SMITH
Rhodopseudomonas spheroides: High Catalase and Blue-Green Double Mutants 143

HARRY H. WASSERMAN, JAMES E. MCKEON, AND URSULA V. SANTER
Studies Related to the Biosynthesis of Prodigiosin in *Serratia marcescens*.... 146

TADEUSZ KLOPOTOWSKI, MARIO LUZZATI, AND PIOTR P. SLONIMSKI
Evidence for a New Step between ATP and 5-Amino 4-Imidazolcarboxamide Ribotide in the Cyclic Process of Histidine Biosynthesis 150

L. STEVENS AND L. A. STOCKEN
Thymine and Uracil Catabolism in Foetal and Young Rat Liver 155

JUDITH G. LEVIN AND DAVID B. SPRINSON
The Formation of 3-Enolpyruvyl Shikimate 5-Phosphate in Extracts of *Escherichia coli* 157

MANUEL GOLDMAN AND HAROLD J. BLUMENTHAL
Pathways of Glucose Catabolism in Intact Heat-Activated Spores of *Bacillus cereus* 164

ROGENE F. HENDERSON AND ROBERT E. EAKIN
Inhibition of Malic Dehydrogenase by Cyclic Disulfides 169

JONATHAN BRODIE AND JOHN W. PORTER
The Synthesis of Mevalonic Acid by Non-Particulate Avian and Mammalian Enzyme Systems 173

L. ELLENBOGEN, D. R. HIGHLEY, H. A. BARKER, AND R. D. SMYTH
Inhibition of Cobamide Coenzyme Activity by Intrinsic Factor 178

GEORGE WEBER, GOURI BANERJEE, AND JAMES ASHMORE
Activities of Enzymes Involved in Glycolysis, Glucogenesis, and Hexosemonophosphate Shunt in Rat Adipose Tissue 182

VICTOR GINSBURG
A Guanosine Diphosphate Aldoheptose in Yeast 187

JAMES G. VAN DYKE
An Oxygen Effect on the Efficiency of Inactivation of *Escherichia coli* by Incorporated Radiophosphorus 190

Charles U. Lowe and William Garner
The Isolation from Rat Liver of a Glycogen Complex Which Contains RNA Fragments 196

Raymond Shapira and Suzanne Parker
Artificially Induced Microheterogeneity in Ribonuclease 200

Howard A. Tanner, Thomas E. Brown, Clyde Eyster, and R. W. Treharne
A Manganese Dependent Photosynthetic Process 205

D. H. Bone
Localization of Hydrogen Activating Enzymes in *Pseudomonas Saccharophila* 211

Ronald Bentley
Tropolone Biosynthesis: Origin of the Carboxyl Groups of Stipitatonic and Stipitatic Acids 215

K. W. Floyd and R. W. Whitehead
On the Role of Vitamin B_{12} in Thymidine Synthesis 220

H. Weissbach, W. Lovenberg, and S. Udenfriend
Enzymatic Decarboxylation of α-Methyl Amino Acids 225

C. H. Shunk, F. R. Koniuszy, E. L. Wong, N. R. Trenner, B. H. Arison, and K. Folkers
Coenzyme Q. XXII. Chromenols Corresponding to Coenzyme Q_{10} and Hexahydrocoenzyme Q_4 228

B. B. Marsh
Identification of the Muscle Relaxing Factor 233

Number 3, September 1960

Leo M. Hall. Preparation of D-Glyceraldehyde-3-Phosphate and Dihydroxyacetone Phosphate Hydrazones 239

Camillo Artom and Hugh B. Lofland, Jr. Lecithin Formation by Methylation of Intact Phosphatidyl Dimethylethanolamine 244

Oscar Touster, Ray W. Hester, and Rita Anne Siler. The Inhibition by Ethionine of the Enhancement of Ascorbic Acid Excretion by Barbital and by 3-Methylcholanthrene in the Rat 248

Lewis Siegel and Sasha Englard. Malic Dehydrogenase From Acetone-Dried Powders of Whole Beef Heart Muscle 253

J. Blumenstein and G. R. Williams. The Enzymic N-Methylation of Glycine.. 259

Lemuel D. Wright, Lan-Fun Li, and Roberta Trager. The Site of Vanadyl Inhibition of Cholesterol Biosynthesis in Liver Homogenates..... 264

G. W. Schaeffer, F. A. Haskins, and J. J. Gorz. Genetic Control of Coumarin Biosynthesis and β-Glucosidase 268

Richard Abrams, Leon Libenson, and Mary Edmonds. Conversion of Cytidine 5′-Phosphate to Deoxycytidine 5′-Phosphate in Cell-Free Mammalian Extracts 272

Rivka Rudner. Mutation as an Error in Base Pairing 275

Y. Hatefi, A. G. Haavik, and P. Jurtshuk. Studies on the Electron Transport System: XXXII. Reduction of Coenzyme Q by DPNH..... 281

G. H. de Haas, I. Mulder, and L.L.M. van Deenen. On the Specificity of Phospholipase A 287

Cesar Milstein. The Activation of Phosphoglucomutase 292

T. Nakamura and H. S. Mason. An Electron Spin Resonance Study of Copper Valence in Oxyhemocyanin 297

A. H. W. M. Schuurs, S. R. de Kloet, and V. V. Koningsberger. Nucleoside Triphosphate Dependent Peptide Activation by a Crude Soluble Protein Fraction of Baker's Yeast: A New Type of Activation Mechanism 300

George J. Spyrides and Herman M. Kalckar. Accumulation of Uridine Diphosphogalactose in a Bacterial Mutant Defective in Epimerase..... 306

Anthony J. Sberra, Robert F. Gilfillan, and Wadi A. Bardawil. The Hexose Monophosphate Pathway in Arterial Tissue 311

Martin Saunders and Philip D. Ross. A Simple Model of the Reaction between Polyadenylic Acid and Polyuridylic Acid 314

Martha Kent and Millie A. Gortner. Conversion of Indoleacetaldehyde to Indoleacetic Acid by Microbial Contamination 319

Sasha Englard, Lewis Siegel, and Hilda H. Breiger. Purification and Properties of Beef Heart Muscle "Cytoplasmic" Malic Dehydrogenase..... 323

Leopold R. Cerecedo, Sister Marian Jose Smith, and Jesus Vicente. Tumor-Host Relationships Studies *in Vitro*: Experiments with Tissue Slices 328

Number 4, October 1960

Earl E. Jacobs and F. L. Crane. Uncoupling and Inhibition of Succinate Oxidation by Short Chain Derivatives of Coenzyme Q 333

James C. Reid and Arnold W. Pratt. Vector Analysis of Ultraviolet Mixture Spectra: The Composition of Ribonucleic Acid 337

S. Oomori and S. Mizuhara. Structure of a New Amino Acid Isolated From the Urine of Hypercholesterolemic Patients 343

D. Tucker and S. Grisolia. Some Stability Effects of ATP, Mg^{++}, and Dinitrophenol on Actomyosin and Myosin Adenosinetriphosphatase..... 346

C. W. Shuster and F. Lynen. The Role of Cofactors and Enzyme-Bound Biotin in the CO_2-Pyruvate Exchange Reactions..... 350

STATEMENT OF POLICY

BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS has been initiated to meet the need for the rapid dissemination of information in all areas of experimental biology. This new medium is intended to afford an opportunity for rapid publication of timely and significant observations in the form of short but well documented communications. It will enable investigators in diverse fields of modern experimental biology better to keep abreast of current ideas and findings.

Rapid dissemination of this knowledge should prevent unnecessary duplication of effort; furthermore, new and exciting information will reach investigators in a minimum length of time.

It is hoped that authors will feel free to submit reports of current investigations which will be of immediate value to other scientists and promote the general progress of biochemical and biophysical research.

THE EDITORS
